TOMATO—POTENTATE

This recent introduction is one of the largest fruiting English cluster types now so popular for Autumn market crops. We have now had experience with it over two seasons, and it is our opinion that within a few years it will largely replace Walker's Recruit and other similar types so popular in recent years. Compared with Recruit, average size of fruit is larger; they maintain size better on top bunches; and quality of flesh is far superior, being practically free of hard core. Vigorous habit of growth and comparative Fusarium resistance make it a most desirable variety to plant. Pkt. 6d. See bulk price list for larger quantities.

SEED NEWS

AUTUMN, 1940

RETROSPECT: Last Autumn will be remembered by Commercial horticulturalists, cut flower growers in particular, as one of the most difficult seasons yet experienced. The unusually heavy rain and almost continuous cloudy weather in March and April, following the hot and dry late Summer months, produced conditions favourable for the rapid development of diseases and multiplication of insect pests.

Root and Crown Rot devastated many crops of Iceland Poppies, Stocks, Carnations, Zinnias and Delphiniums. On the better drained soils the trouble seemed to be less pronounced, and plants from sterilized seed beds gave considerably better results. We recommend all growers who have had trouble in this respect to obtain from The Under-Secretary, Department of Agriculture, Sydney, **Plant Disease Leaflet No. 70**, which gives Formalin treatment for seed beds and suggestions for field treatment of growing crops. Another disease which was very prevalent in early Sweet Pea crops was the "Stem Blight," which is first noticeable as spots on the leaves. Although experiments have not been completed to indicate the best treatment for this trouble, it is suggested that regular sprayings of Bordeaux Mixture may be an advantage.

Bronze Wilt was also responsible for quite a lot of losses in Sweet Peas and other crops, and Sweet Pea Mosaic also caused trouble to some growers. At present there is no treatment we can recommend for these troubles. In the case of Mosaic a certain amount of infection may be seed borne.

SUPPLIES: It is frequently said that horticulturalists do not recognise international boundaries, and it has been our practice in the past to procure supplies from where the best seeds were produced. The war has cut off supplies of a few excellent strains, and will make it very difficult to procure others. However, by far the greater portion of our varieties are grown in Australia, New Zealand and U.S.A., and we do not expect to experience very great difficulties for the 1940 season, although some delays in delivery of English and European varieties is to be expected.

Should the position arise (as no doubt it will if the war is prolonged), when our supplies of proven strains of some varieties are cut off and we find it necessary to use strains not so well-known to us, we shall always endeavour to advise customers of the fact, so that they can please themselves whether they sow the seeds or return them to us.

PRICES: At the outbreak of war there was an immediate depreciation of the Australian £1 in respect to U.S.A. dollars, and increases in shipping freights and insurances. These factors have increased considerably the landed costs of 1939 crop seeds now coming to hand from overseas. There have also been increases in cost of paper for printing, which is quite an item in the seed trade. The indications are that local costs will increase with the probability of increases in postal rates.

Our endeavour has been as far as possible to keep prices stable once our catalogue is issued, until the next issue in about six months' time, and this was fairly easy to do in normal times, but to do this now would be virtually impracticable if we were to continue on our previous policy of paying carriage on all vegetable and flower seeds to all parts of the Commonwealth. It would mean we would have to increase prices considerably to cover anticipated increases in costs. Therefore, after very careful consideration, we have decided that the most equitable means of keeping prices stable is for each customer to pay his own transportation charges on bulk seeds. See explanation on page 4 for full details. Obviously the larger the order the greater will be the saving in freight, and if we can handle fewer but larger orders during the year, it will further help to reduce overhead costs and keep prices within bounds.

RUMSEYS SEEDS PTY. LTD.

December 1st, 1939.

GARDEN HANDBOOKS

WRITTEN BY HERBERT J. RUMSEY

The popularity of these helps to the gardener is daily increasing; many letters are received testifying to the assistance given by the books.

THE NEW A.B.C. OF VEGETABLE GROWING

FREELY ILLUSTRATED. PRICE: TWO SHILLINGS
Posted 2/1. 42nd Thousand. Entirely re-written.

This book has been the vegetable growers' dictionary and school teachers' text book for a quarter of a century. It has been kept in type and revised for each new edition and several times re-written. Men who learned their gardening from it have bought a copy for their sons and daughters.

THE AUSTRALIAN BOOK OF BERRIES

(3rd Edition)

The standard work on all small fruit culture, including:

STRAWBERRY, LOGANBERRY, RASPBERRY, GOOSEBERRY, CURRANT, &c. Third Edition, entirely revised and brought up to date. Price: ONE SHILLING. Posted 1/1.

THE "A to Z" OF AUSTRALIAN FRUIT GROWING

Over 200 Pages. Many Full Page Illustrations.

The aim of the author has been to make this book as helpful to the fruitgrowers as the vegetable book has been to the gardener. It deals with the culture of every variety of fruit suited to Australian conditions from "A to Z," including not only cultivation, but packing, drying, preserving, and bottling. The schedule of insect pests will be found very helpful. New Edition, 2/-; Post Paid 2/1. We still have a few copies left of the old edition at 1/3 each, post paid.

THE GARDEN FAIR IN AUSTRALIA

At present out of print. New edition being entirely rewritten and brought up to date.

THE AUSTRALIAN TOMATO BOOK

The most complete work published in Australia on this most important crop, it will be found helpful to both amateur and professional, and even as a cookery book will be worth its small cost. Second edition revised and enlarged, with chapter on tomato growing under glass. 2/-, posted 2/1.

THE AUSTRALIAN NUT, AND NUT GROWING IN AUSTRALIA

This book opens up a new subject altogether, and treats at length on matters that have been too long overlooked. PRICE: 1/3; posted 1/4.

We will send any of the books at the prices named, or when two or more are ordered at the same time they will be sent at the published prices without the extra charge for postage.

SOWING CALENDAR FOR SUMMER & AUTUMN

For County of Cumberland and similar climates. Gardeners in Mountain, Inland, Semi-Tropical and Tropical climates must make allowance for variation of their climatic conditions.

DECEMBER

VEGETABLES:

French beans (dwarf, runner and wax), beet, cabbage, celery (under shade), cucumber, radish, lettuce (where to grow), marrow, pumpkin, squash, cape gooseberry, cauliflower, tomato, sweet corn and turnip.

Plant out tomatoes, sweet potato, cape gooseberry, egg plant, and pepper.

FLOWERS:

Sow Antirrhinum, Aster, Balsam, Cosmos, Delphinium, Didiscus, Kochia, African Marigold, Pansy (end of month), Petunia, Phlox, Portulacca, Stock (end of month), Sunflower, Tithonia, Viola (end of month), Zinnia.

Plant Dahlias (green plants), Bouvardias.

JANUARY

VEGETABLES:

Green and butter French beans, beet, spinach beet, cabbage, cauliflower, cucumber, leek, lettuce (where to grow), parsley, parsnip, radish and early maturing tomatoes for late crop.

Transplant celery, cabbage, cauliflower, and tomato plants.

FLOWERS:

Sow Acroclinium, Ageratum, Alyssum, Antirrhinum (Snapdragon), Aquilegia, Calendula, Carnation, Cineraria, Cyclamen, Dianthus, Didiscus, Gaillardia, Leptosyne, Lupin, French Marigold, Matthiola, Mignonette, Nemesia, Pansy, Iceland Poppy, Stock, Sweet Pea (end of month), Viola, Wallflower, Zinnia.

FEBRUARY

VEGETABLES:

French beans may still be sown in warm situations, beet, spinach beet, cabbage, carrot, cauliflower, celery, leek, lettuce, onion, radish, peas, parsnip, turnip, Swede, and Winter rhubarb.

Plant out cabbage, cauliflower, celery and late tomatoes.

FLOWERS:

Sow Acroclinium, Ageratum, Alyssum, Antirrhinum (Snapdragon), Aquilegia, Bellis perennis, Calendula, Coreopsis, Campanula, Candytuft, Carnation, Centaurea (Cornflower), Cineraria, Clarkia, Cyclamen, Delphinium, Dianthus, Didiscus, Digitalis (Foxglove), Gaillardia, Geum, Godetia, Gypsophila, Hollyhock, Hunnemannia, Leptosyne, Linaria, Lobelia, Lupin (main sowing), French Marigold, Matthiola, Mignonette, Nasturtium, Nemesia, Nemophila, Pansy, Perennial Pea, Penstemon, Iceland Poppy, Primula malacoides, Scabiosa, Schizanthus, Statice, Stock, Sweet Pea, Viola, Wallflowers.

MARCH

VEGETABLES:

Broad beans, borecole, beet, cabbage, cauliflower, celery, lettuce, broccoli, Kohl-rabi, leek, pea, radish, carrot, parsnip, herbs, spinach beet, spinach (true), turnip and swede, mustard, cress and onion.

Plant out spinach beet, lettuce, cabbage, cauliflower and celery.

FLOWERS:

Sow Acroclinium, Ageratum, Alyssum, Anemone, Antirrhinum (Snapdragon), Bellis perennis, Calendula, Coreopsis, Campanula, Candytuft, Carnation, Centaurea (Cornflower), Cineraria, Clarkia, Delphinium, Dianthus, Digitalis (Foxglove), Gaillardia, Geum, Godetia, Gypsophila, Hollyhock, Hunnemannia, Leptosyne, Linaria, Lobelia, Lupin, Matthiola, Mignonette, Nemesia, Nemophila, Pansy, Perennial Pea, Penstemon, Poppy (Iceland or Shirley), Ranunculus, Saponaria, Scabiosa, Schizanthus, Statice, Stock, Sweet Pea, Viola, Wallflower.

Plant bulbs of Anemone, Ranunculus, Daffodil, Ixia, Freesia, Lachenalia.

APRIL

VEGETABLES:

Broad bean, beet, spinach beet, cabbage, carrot, leek, lettuce, onion, parsley, parsnip, pea, radish, spinach, turnip, herbs, mustard, cress, kohlrabi, endive and Chinese cabbage.

Plant eschallots, Winter rhubarb, garlic, cabbage, cauliflower, herbs, celery, onion, lettuce and spinach beet.

FLOWERS:

Sow Acroclinium, Ageratum, Alyssum, Antirrhinum (Snapdragon), Bellis perennis, Calendula, Coreopsis, Candytuft, Carnation, Centaurea (Cornflower), Clarkia, Delphinium, Dianthus, Gaillardia, Godetia, Gypsophila, Larkspur, Leptosyne, Linaria, Lobelia, Lupin Mignonette, Nemesia, Pansy, Shirley Poppy, Saponaria, Scabiosa, Statice, Stock, Sweet Pea, Viola, Wallflower.

Plant bulbs of Anemone, Babiana, Daffodil, Freesia, Hyacinth, Iris, Ixia, Lachenalia, Muscari, Snowflake, Tulip.

MAY

VEGETABLES:

Broad bean, beet, spinach beet, carrot, lettuce, leek, onion, parsley, herbs, pea, endive, kohlrabi, early cabbage, mustard, early tomatoes under cover.

Plant eschallots, garlic, herbs, cabbage, rhubarb, leek, lettuce, onion and spinach beet.

FLOWERS:

Sow seeds of Ageratum, Alyssum, Antirrhinum, Bellis perennis, Calendula, Coreopsis, Candytuft, Carnation, Clarkia, Delphinium, Dianthus, Gaillardia, Godetia, Gypsophila, Larkspur (main sowing), Linaria, Mignonette, Shirley Poppy, Saponaria, Scabiosa, Statice, Sweet Pea.

Plant Fruit Trees, Roses, Ornamental Trees and Shrubs, Strawberry, Carnations, Violets, Grape Vines.

IMPORTANT—PLEASE READ

PRICES.—Prices given in this catalogue are those current when catalogue is made up for printing and we reserve the right to alter any of them without notice at any time that conditions should warrant such action.

SUPPLY.—We cannot guarantee to supply all varieties and quantities as listed. Sometimes a variety will be sold out early in the season due to unusual demand or shortage of crop and occasionally we have to withdraw certain stocks from sale due to sudden falling off of viability.

QUOTATIONS.—Written or verbal quotations are for immediate acceptance and subject to stock remaining unsold when order is received.

DESCRIPTIONS.—Descriptions given in this catalogue are of the type plants from which seed crops have been grown and are intended to serve as a guide only to buyers. Under certain conditions of soil and climate considerable variation may occur with certain strains, particularly in respect to size, maturity and productiveness. Where we have found any tendency to variation under any definite set of conditions or areas we have indicated it.

TERMS OF BUSINESS.—The terms on which our prices are based are cash with order. Plants are not sent "Cash on delivery" by post. For cash we accept Commonwealth Bank Notes in registered letters, Australian postal notes and money orders. For larger amounts, cheques or bank drafts should be used. Money orders and postal notes should be made payable at Parramatta. Please add 6d. to country and interstate cheques for collection charges made by the banks.

AGENTS.—We do not appoint agents to sell any of our products, but welcome inquiries from retail seedsmen for quotations for bulk lots of vegetable and flower seeds.

SUBSTITUTING.—Sometimes owing to crop failures or shortage of stock we sell out of some varieties early in the season. In such cases we substitute the nearest variety, and send to save disappointment, but in no case do we expect you to keep the substituted article if you do not wish to do so. If you mark your order "do not substitute," we omit the variety. If you return the substituted seeds we give you credit for the amount.

REMITTANCE BALANCES.—In cases where remittance falls short of amount of order and customer has not established a credit account with us, it is our practice to omit portion of order to the extent of deficiency. Where amount remitted is in excess of cost of order, such as in allowance for transport costs or reduction of prices, it is our practice to send extra seeds for balances less than 1/6 and Credit for later orders amounts in excess of this. If so instructed, we will refund balance.

CONDITIONS OF SALE.—Although at time of sale our seeds comply fully with the provisions of the Agricultural Seeds Act, 1921 (N.S.W.), there are certain things beyond our control which may affect growth. Therefore, for our protection all goods are sold subject to the following conditions:—

We believe that all Seeds, Bulbs, and Roots sold by us are of the description and kind specified by us at the time of sale, but owing to the practical impossibility in many cases of being certain of this, we give no understanding that such Seeds, Bulbs, or Roots will correspond with the description under which they are sold, and we make all sales subject to this condition. We further give no warranty, express or implied, as to their growth, description, quality, or productiveness, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms they are at once to be returned to us.

"Rumseys' Honest Seeds" are tested for germination and vitality.

NEW FREIGHT AND POSTAGE POLICY

WE PAY FREIGHT OR POSTAGE

On all orders for Packets and Ounces exceeding 2/6 in value, unless stated otherwise in Catalogue

ADD EXTRA FOR FREIGHT OR POSTAGE

On all orders for Packets and Ounces under 2/6 in value, and where specially mentioned in Catalogue

On all orders for ¼lb. lots or over of Bulk Seeds.

On all PEAS, BEANS, FARM SEEDS, PLANTS, BOOKS and GARDEN SUNDRIES

VEGETABLE SEEDS AND ROOTS

ALL PACKETS AND OZS. ARE POST PAID UNLESS QUOTED OTHERWISE.
ON ORDERS TO THE VALUE OF 2/6 AND OVER

$\frac{1}{2}$ oz. supplied at 1oz. rates (subject to minimum charge of 8d. per item) unless quoted otherwise.

BUSH FRENCH BEANS

There is an acute shortage of seed beans for late summer and autumn sowings this year, and further supplies of Brown Beauty, Tweed Wonder and Hawkesbury Wonder will not be available until after autumn harvest. We are still able to offer the following, but supplies of these are not over-abundant.

CANADIAN WONDER.—Popular market bean, very hardy. Pkt., 6d. (post paid, 8d.).

BURPEES STRINGLESS GREENPOD.—A good quality bean, which does well during the cooler autumn months. Pods very fleshy and brittle. Not being flat-podded, it is not ideal for Sydney market requirements, but is an excellent home garden or local sale variety. Pkt. 6d. (post paid, 8d.).

STAYLEY'S SURPRISE.—This is an excellent market bean for rich, deep alluvial soils where plants will grow tall, keeping long pods away from the earth. Not recommended for poorer shallow soils. Pkt. 6d. (post paid, 8d.).

BURNLEY CANADIAN.—A Vic. selection showing marked resistance to Halo blight. Unfortunately, it is very susceptible to Pod Spot, so cannot be recommended for early crops or North Coast. Pkt. 6d. (post paid, 8d.).

NEW DISCOVERY.—May be classed as an improved Feltham Prolific. Also known as Wonderful. Dwarf, early heavy cropping variety. Pkt. 6d. (post paid, 8d.).

BROAD BEANS

Sow in autumn and winter. Pkt. 6d. (post paid, 9d.).

EARLY LONG POD.—Our trials over many years have shown this variety to be best suited to N.S.W. conditions generally.

SUGAR PEAS

TALL.—Require staking like beans. The pods are cooked whole. Pkt. 6d. (post paid, 8d.).

PEA

In the coastal and warmer climates peas are best treated as a winter crop, sown in autumn. In the cooler and mountain climates spring sowing is best.

W. F. MASSEY.—18 inches. An extra early pea of exceptional merit. Ready three weeks before Greenfeast. Recommended for a quick crop in autumn or spring. For an extra early pea it is very prolific, giving two or three good pickings of well filled bright green pods. Sold extensively as "Gem" by Sydney seedsmen. We do not advise sowing this variety before March in coastal districts. Pkt. 6d. (post paid, 9d.).

RICHARD SEDDON.—20 inches. The best second early pea for market or home use. Heavy crops of exceptionally well filled pods. In season between W. F. Massey and Greenfeast. Pkt. 6d. (post paid, 9d.).

GREENFEAST.—30 inches. This is the most popular market pea. Bright green pods make it readily saleable. Does not stand wet conditions as well as W. F. Massey. Excellent variety for growing on wires. Pkt. 6d. (post paid, 9d.).

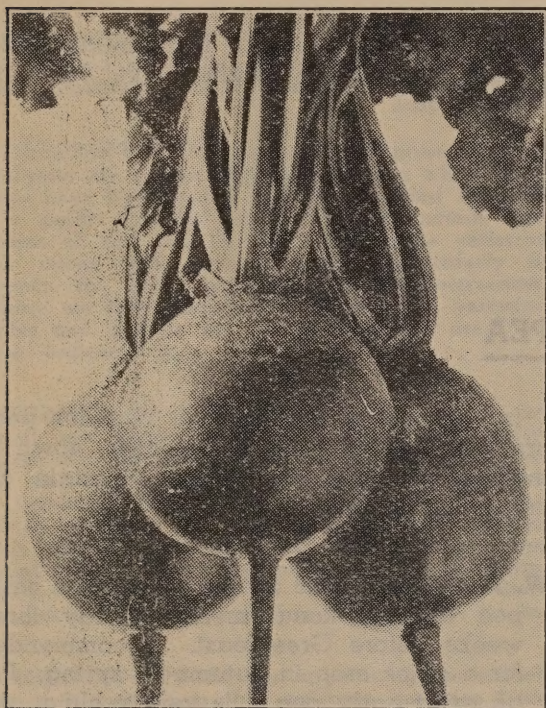

ALDERMAN.—The best tall-growing variety for stakes or trellis. Large crops of enormous pods. Pkt. 6d. (post paid, 8d.).

HALF LONG BEET

Pkt. 3d., oz. 8d.; 2oz. 1/- each variety.

Requires deep soils, cool climate and autumn planting.

OBELISK (Rumsey's Special Strain).—Half Long, good colour and flavour. Fine for slicing.

Improved Detroit Dark Red

SILVER or SPINACH BEET

Pkt. 3d., oz. 8d., 2oz. 1/- each variety.

Spinach beet, from its continuous cropping habit, has taken the place of spinach.

DARK GREEN BROAD RIB.—A short growing flat-leaved variety, popular for market with some growers. Although easier to bunch than Fordhook Giant, it is not the same quality.

LUCULLUS.—Large ruffled light green leaves, broad mid-rib.

FORDHOOK GIANT.—Rich green, crinkled leaves, up to 10 inches in width and 2½ feet in height. Stems pearly white, 2½ inches wide, thick and succulent. Special strain.

TURNIP ROOTED BEET

Pkt. 3d., oz. 8d., 2oz. 1/-, each variety.

Turnip-rooted beet may be sown in rows or transplanted almost any month.

CRIMSON KING.—A deep crimson fleshed globe shaped beet of exceptional quality. Quite as early as Early Wonder, but tops a little brittle for some growers.

EARLY WONDER (Rapid Red).—Fine quality beet for early market or home garden. Our strain has been selected for quick maturity and quality of roots. Good tops for bunching. We offer two strains of this variety for market growers. Winter strain grows stronger tops than summer strain during colder months.

IMPROVED DETROIT DARK RED.—A pure line strain of this remarkable market variety. Fine dark color. One of the finest quality strains of beet we have ever grown.

CROSBY'S EGYPTIAN.—Popular home garden and market variety. Fine quality red fleshed beetroot, growing to about 3 inches diameter.

Fordhook Giant

CRIMSON KING IS A QUALITY BEET

BRUSSELS SPROUTS

Pkt. 6d.

RUMSEY'S GIANT PROLIFIC.—A fine vegetable for the cooler districts. Sow seed in early autumn or late summer. oz., 1/6.

LONG ISLAND IMPROVED.—A dwarf strain of merit from U.S.A. oz., 1/9.

Brussels Sprouts

CRESS

Pkt. 3d., oz. 8d.

TRIPLE CURLED or LAND CRESS.—This is used as a salad with mustard.

CELERY

Pkt. 6d.

Celery does well from either early spring (July-August) or summer, and early autumn sowings. Shade must be provided for seed beds when sowing in summer to ensure a good stand. Plenty of water is necessary for success.

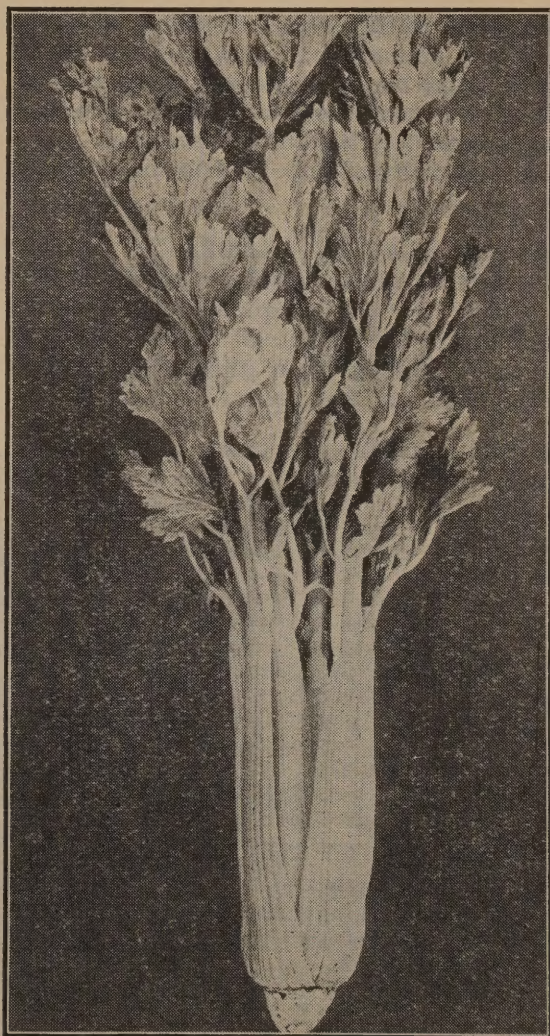

SUPREME GOLDEN.—An outstanding new strain of Golden Yellow Self-Blanching type producing compact cylindrical plants 22 to 27 inches tall, according to soil and growing conditions. Edible stems, broad and thick, 7 to 10 inches to first joint. ¼oz. 1/-, oz. 3/6.

FORDHOOK.—A hardy variety of outstanding merit. Of dwarf type, the stalks are smooth and very thick. The colour snow white, the heart tinged with yellow. Flavour, nutty and crisp. ¼oz. 1/-, oz. 3/-.

GIANT PASCAL.—A late variety, producing tall, thick stalks. Blanches to an attractive light yellow. Tasty and crisp. oz. 1/6.

SOUTH AUSTRALIAN WHITE.—Chiefly grown in South Australia for sending to Interstate market. Rather coarse quality, but sells readily on account of its size. oz., 4/3. Supplies doubtful.

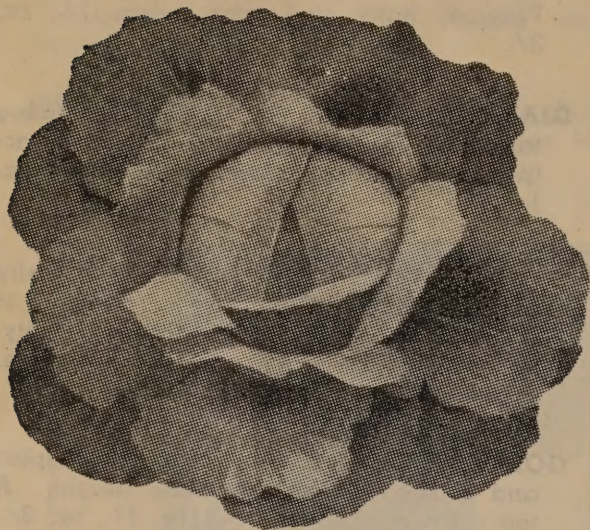

GOLDEN PHENOMENAL.—Heavy, compact and full-hearted; intermediate height. A top price market variety. ¼oz. 1/-, oz. 3/-.

Golden Phenomenal

CABBAGE

Packet 6d., all Varieties.

Allhead Early

ALLHEAD EARLY.—A popular cabbage for both autumn and spring crops. Forms good solid heads of medium size, and not too many outer leaves. One of the best cabbages for November-December sowings, as it stands up well to late summer heat. oz. 1/6.

EARLIEST FORCING GLOBE.—No supplies available of this popular early market variety. For the duration of the war we do not expect to have further supplies. Suggest Golden Acre grown under good conditions as the nearest substitute.

GOLDEN ACRE.—An extra early small round headed cabbage. Fine quality and solid. oz. 1/8.

COPENHAGEN MARKET.—Special strain. A quick maturing cabbage, now becoming very popular for market. We have found it excellent for spring cropping and most reliable. Also recommended for quick autumn crop from late summer sowing. oz. 1/8.

EARLY JERSEY WAKEFIELD.—Special strain. Sweetest small early cabbage for home use. Sugarloaf shape. oz. 1/8.

SHORT-STEM DRUMHEAD (Early).—Grows close to the ground and makes very heavy heads. Blue green leaves are very tough, making it an excellent cabbage for severe conditions in late summer and winter. oz. 1/6.

SUCCESSION.—Peter Henderson stock. The stock we offer is supplied by the originators. We have found this a very reliable variety for main autumn crops, but there is a tendency for early spring crops to "bolt" under certain conditions, particularly after a rather severe winter. One of the largest of second early cabbages. oz. 4/-.

CUMBERLAND.—A cross between Copenhagen Market and Glory of Enkhuisen. Just the right size for present-day market demands. Matures a little more quickly than G. of E., but is slightly larger and a little later than C.M. Colour is right and size is right. Try it this autumn. oz. 1/6.

Copenhagen Market

ALLHEAD EARLY IS A GOOD AUTUMN CABBAGE

CABBAGES (Continued).**Surehead**

SUREHEAD.—Having so few outer leaves, it can be grown closely in the rows, and will give a very great weight of cabbages per acre. Large round flattened, extra firm. Keeps well. oz. 2/-.

CHINESE CABBAGE

When sown in February or March and in the cool climates in June, the plants develop quickly, forming large, tightly folded heads of tender leaves, beautifully blanched in the heart. Chinese cabbage is used sliced raw as a salad like lettuce, or is delicious when boiled.

WONG BOK.—Grown to a considerable extent for poultry greens. The leaves are tightly folded and well blanched, the ribs juicy and agreeably pungent. oz. 1/-.

SAVOY CABBAGE

PERFECTION SAVOY (Drumhead).—Good for winter growth in the cold districts; much improved by good frosts after maturing. oz. 1/8.

RED CABBAGE

MAMMOTH ROCK RED.—Solid, dark red heads, good for pickles or for cooking. oz. 1/8.

**Midseason Market**

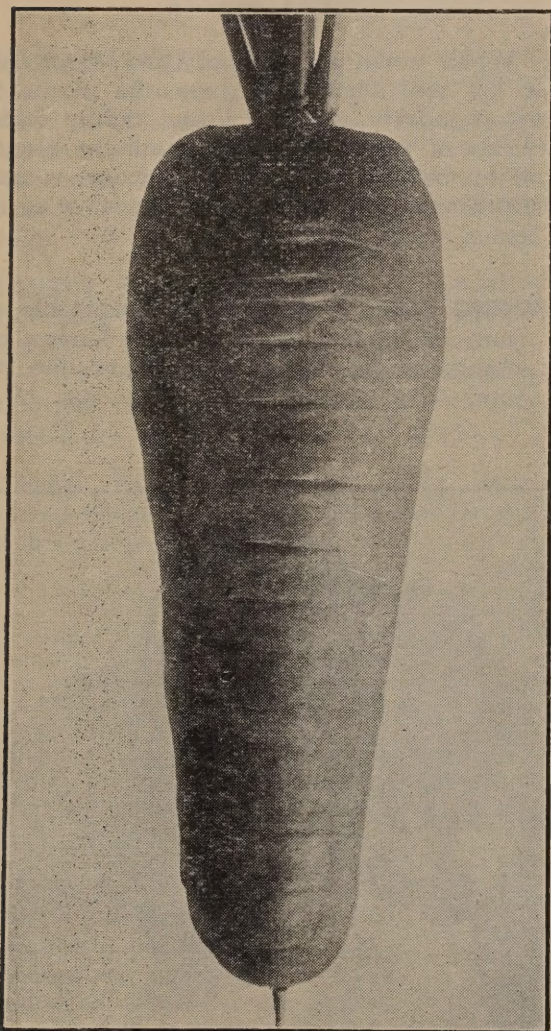

TABLE CARROTS

Pkt. 3d., oz. 8d., 2oz. 1/-, each variety.

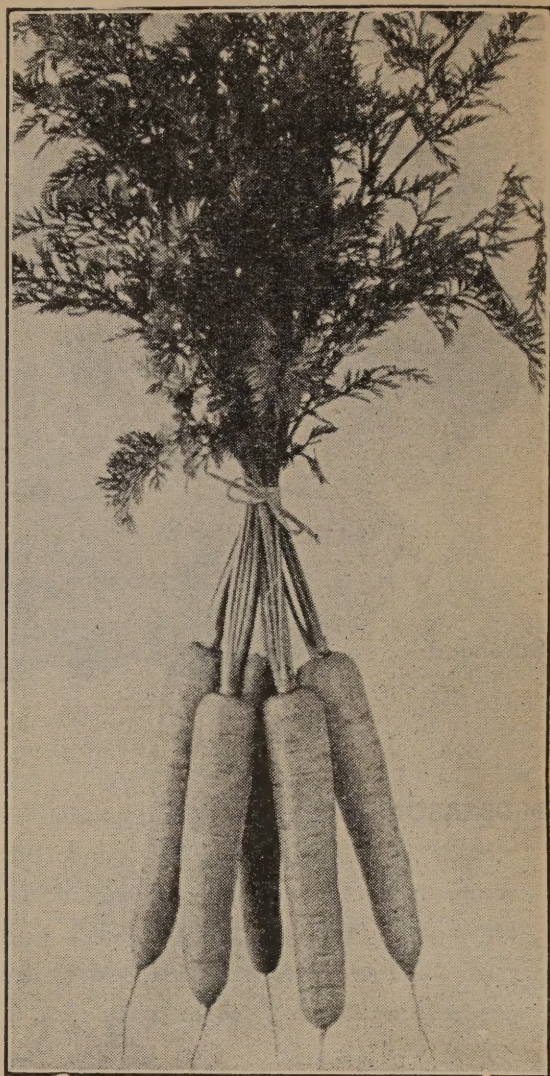

LONG BUNCHING.—A longer and better coloured bunching carrot for market. Roots are 9 to 10 inches long under good conditions, and up to $1\frac{1}{2}$ inches diameter. When mature almost cylindrical and well stumped. Necks are small, but leaves tough. Requires good soil for best results.

EARLY NANTES.—(True French strain). Half-long variety, with a stump root and a fine tap-root. The roots average about six inches in length, and $1\frac{1}{2}$ inches in thickness.

DANVERS HALF LONG.—Red Cored strain. A first quality market carrot, becoming very popular for marketing in sacks.

Red Cored Chantenay

Carrot Long Bunching

ST. VALERY.—An intermediate carrot with long tapered roots, 10 inches in length.

RED CORED CHANTENAY.—Extra fine quality, rich orange colour, with core almost the same colour as the flesh and of equal quality, stump rooted, uniform and delicious.

IMPERATOR.—An excellent market carrot for those who desire a little more length than in Chantenay. Not quite so thick in the shoulder. Excellent carrot for bagging.

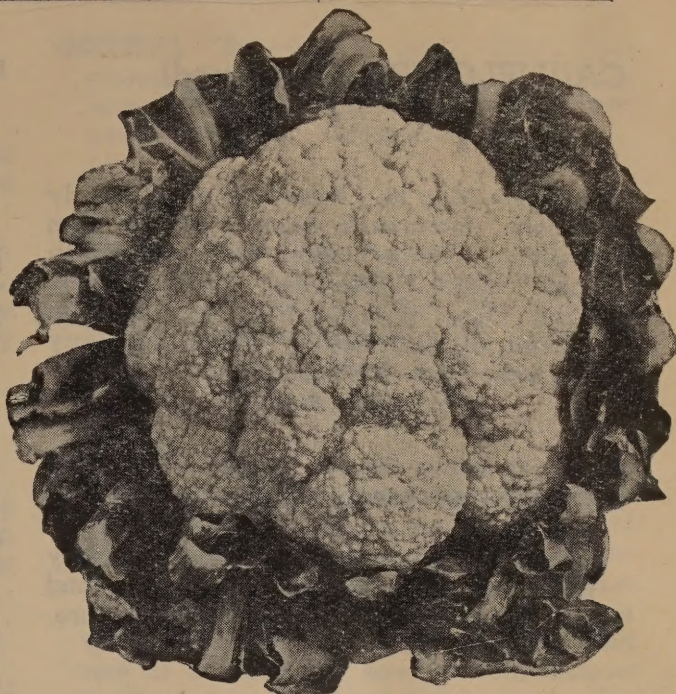

EARLY SHORTHORN.—A fine variety for quick growth and for shallow soils.

SOW DANVERS AND IMPERATOR FOR "BAGGING"

CAULIFLOWERS

Pkt. 6d.

Cauliflower seeds should be sown from December to March in the warmer parts, and November to February in the cooler districts. Manure heavily before planting out; irrigate well or apply water before they get too dry. Extra early varieties are not recommended for the County of Cumberland. Where plenty of water is available for irrigating, November sowings of early varieties in tableland districts are usually successful for autumn cutting. In parts of Victoria and Tasmania, early maturing varieties are successful from early spring sowings.

Burpee's Best Early

EARLY CAULIFLOWERS

SUPERIOR "K."—This is the most promising early variety we have had for many years. From late January sowing in coastal districts it has produced beautiful heads in 10 to 12 weeks from planting out. Has given excellent results in Perthville district from November sowing. Curd is deep and of fine quality and suitable size for market. Inner leaves fold over and protect the heads to a far greater extent than is the case with most early maturing varieties.

¼oz. 4/6, oz. 12/6.

Cauliflower—Superior "K"

BURPEEANA.—Matures in 3 to 3½ months from planting out. The heads are so uniformly shaped and formed as to be remarkable. The foliage is full and of a fine dark green, and the inner leaves curl over the head and protect it against the weather. Burpeeana has a beautiful white curd, smooth and free from small leaflets, between the sections, and very attractive on the table when cooked. Very popular in the Perthville district for November sowing, for March-April cutting, but water and manure must be kept up to it. ¼oz. 4/6, oz. 12/6.

EARLY PHENOMENAL.—Matures in about 3½ to 4 months from planting under good conditions. Not generally recommended for County of Cumberland conditions, and we do not recommend planting out before mid-February in coastal districts. ¼oz. 2/-, oz. 6/-.

BURPEE'S BEST EARLY.—Is a splendid variety both for market and the home garden. It is a 3½ months cauliflower, and sowings should be made in time to plant out not later than March or April for autumn crops. ¼oz. 3/-, oz. 10/-.

DRY WEATHER CAULIFLOWER.—This variety produces large pure white solid heads about a week later than the extra early varieties, such as Best Early. Its drought resisting qualities make it a very fine variety for Australian conditions, and many gardeners who do not as a rule succeed with cauliflowers will find it something worth while. ¼oz. 3/-, oz. 10/-.

Continued next page.

CAULIFLOWER (Continued)

NUGGET.—May be classed as second early variety. Matures in about 4 months from planting. Large white deep heads on short stems. Semi-self protecting in habit. One of the earliest to mature in coastal districts from December-January sowings. $\frac{1}{4}$ oz. 3/-, oz. 10/-.
Supplies doubtful.

HAWKESBURY SOLID WHITE.—Another excellent second early variety, maturing in $3\frac{1}{2}$ to $4\frac{1}{2}$ months from planting. Slightly more self-protecting than Nugget, and will stand a little longer when mature. $\frac{1}{4}$ oz. 3/-, oz. 10/-.

MUTTON'S FOUR MONTHS.—A very good cauliflower from a grower in the Bathurst district. $\frac{1}{4}$ oz., 3/-; oz., 10/-.

MID-SEASON CAULIFLOWER

"EARLY" GREENLEAF (or Green Glazed).
—This cauliflower is quite distinct, having dark green leaves with a shiny surface. It is sometimes called "aphis proof" from its resistance to those pests. From our experience this has been called Early because it heads up early in Spring, as it is not early maturing. $\frac{1}{4}$ oz. 2/-, oz. 6/-.

BORONIA GIANT.—Coastal districts and warmer parts of N.S.W. and Queensland. Planted out about the end of January or early February, will produce large snow-white heads about June, and in suitable localities, later planting will give equal results in $4\frac{1}{2}$ to 5 months from planting out.

We regret seed crops of Boronia Giant failed again this year. However, we expect to have available in January supplies of a short stemmed 5-month selection, which will be an excellent substitute. **SELECTED FIVE MONTH,** $\frac{1}{4}$ oz., 2/6; oz., 7/6.

PHENOMENAL MAINCROP.—One of the best for districts west of the dividing range. Matures in six to seven months, coming into head in early spring from autumn sowing. $\frac{1}{4}$ oz. 2/-, oz. 6/-.

LATE CAULIFLOWERS

LATE METROPOLE.—A very late, large and very white cauliflower; vigorous and hardy. The head is well protected by the inner leaves. The heads grow to 18 or 20lb. in weight. Seven months. $\frac{1}{4}$ oz. 1/9, oz. 5/-.

STOP PRESS

CAULIFLOWER SEED CROP REPORT

SUPERIOR "K".—Expected end December.

BURPEEANA.—Expected end December.

NUGGET.—Crops failed.

BORONIA GIANT.—Crops failed.

SELECTED FIVE MONTHS.—Crops light, should have small lots in January.

HAWKESBURY SOLID WHITE.—Crops light, only ounce lots available.

ENDIVE

Pkt. 3d., oz. 9d.

GREEN CURLED.—When well blanched is a welcome addition to salads.

HERBS

Pkt. 6d.

SAGE.—Best broad leaved. Oz. 2/-.

THYME.—Best green leaved. Oz. 3/6.

MARJORAM.—Sweet or knotted. Oz. 3/6.

THYME, SAGE and MARJORAM MIXED.—Oz. 3/-.

KOHL-RABI

Pkt., 3d.; oz., 1/2.

EARLY PURPLE VIENNA.—A fine, tender variety.

LIME SOIL BEFORE PLANTING CAULIFLOWERS

LETTUCE

Pkt. 3d.

ICEBERG.—Handsome curly, light green leaves, with pink tint. Solid head. Good Summer lettuce. Oz. 1/-.

MIGNONETTE.—A crisp curly, small brown lettuce that succeeds in Fiji and very hot climates. Oz. 1/-.

SPECIAL STRAINS OF NEW YORK

Growers of lettuce for market should try our different strains and adopt for each season the one that gives them the best results.

IMPERIAL 847.—This strain has given good results during summer months. A large-hearted strain, but it does not show mildew resistance. Therefore only recommended for summer in coastal districts, but should be worth growing during autumn and spring in upland and inland districts. Oz. 1/4.

IMPERIAL "D."—Stands more frost than others. Our strain of this fine dark green lettuce has become very popular for winter planting. Mildew resisting. Oz. 1/-.

IMPERIAL "F."—One of the best commercial strains for spring, summer and autumn. Combines the qualities of brown blight resistance with resistance to tip burn and mildew. Oz. 1/-.

IMPERIAL 615.—A strain which has become very popular for early winter and early summer crops. Stands cold weather well, has large showy hearts, but does not show the mildew resistance of Imperial "D." and Imperial "F." Is a good winter lettuce in dry seasons, and one of the best for sowing from August to October in County of Cumberland. Oz. 1/-.

NEW YORK No. 12.—A popular strain for summer planting with some growers, but rapidly being replaced by Imperial 847. Oz. 1/-.

NEW YORK—IMPERIAL "F."

LEEK

MUSSELBURGH.—A well-known, good and hardy sort. Pkt., 6d.; oz., 1/4.

ONIONS

Pkt. 6d.

SWEET SPANISH VALENCIA.—A mild onion fairly early in maturity and carries fairly well. Becoming popular for markets in N.S.W.

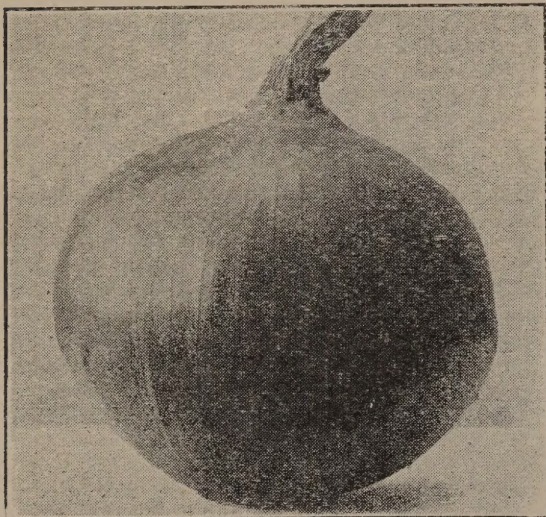

PRIZETAKER.—This onion has done well in all parts of Australia, and in very different classes of soil; for transplanting it is one of the best. It is a very large onion, and frequently measures over 4 inches in diameter. The skin is a beautiful golden brown, and the flesh very solid, crisp, juicy and mild. Oz., 1/6.

BROWN SPANISH.—The standard keeping onion. Hard to beat for general market purposes, select strain. Matures late in season. Oz., 1/2.

EARLY BARLETTA.—Select strain. Our most popular early flat white onion for market and home use. Oz., 1/4.

HUNTER RIVER EARLY BROWN.—Select heavy cropping strain. Growers of Early Brown onions in Queensland and N.S.W. are advised to sow this variety for early market. Deep globular bulbs of excellent texture and quality. Oz., 2/-.

HUNTER RIVER WHITE GLOBE.—A select strain of this early variety for commercial crops. Heavy globe-shaped bulbs of good quality and texture. A good onion to come in after Early Barletta. Oz., 3/-.

Prizetaker.

NEW ONION

EARLY GRANO.—The most outstanding introduction in onions for many years. Introduced from Spain to U.S.A., it immediately became popular. Early maturity, freedom from tendency to "bolt", yield, and keeping qualities make it outstanding as an early variety. Skin is light brown. Flesh of Sweet Spanish or "Odourless" type, very mild and of good quality. Size medium to large. Necks thin. Bulbs a distinctive apple shape. Particularly recommended for Queensland and Coastal N.S.W., where it should be extremely early. ¼ oz., 1/-; oz., 3/-.

"ODOURLESS".—Globe shaped, vivid green leaf strain. A mid-season variety, producing large bulbs suitable for eating raw. Very poor keeper, so should be used quickly after harvest. Oz., 2/6.

IMPERIAL WHITE SPANISH.—The best main-crop white skinned variety. Shape similar to Brown Spanish. Excellent quality, good keeper and heavy cropper. Oz., 2/6.

MULTIPLIER ONIONS

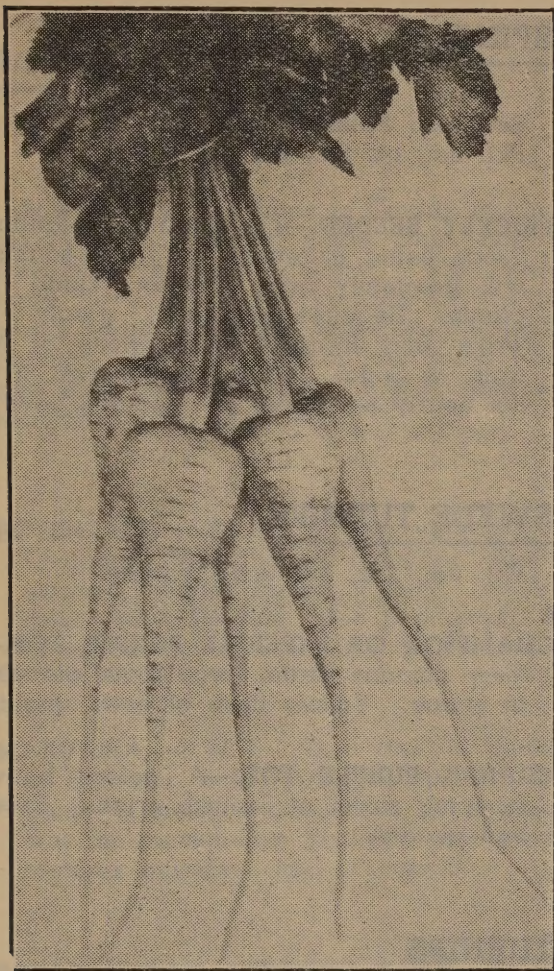

Varieties not generally grown from seeds. Bulbs usually available from February to early Spring.

POTATO ONION.—True strain, excellent for cold climates. 1/3 lb., post extra.

ESCHALLOT, SMALL FRENCH.—Small variety, excellent for salads. 1/- lb., post extra.

TREE ONION.—Tops, 1/3 lb., post extra.

GARLIC.—Used for flavouring. 1/- lb., post extra.

Parsnip—Short Thick

MUSHROOM SPAWN

This may be planted in autumn and winter, in a cave or dark place where the temperature ranges between 50 and 70 degrees.

PURE CULTURE SPAWN.—Locally produced spawn of finest quality. Very reliable. Sufficient to spawn a bed of: 10 sq. ft., 3/-, post 4d. extra; 20 sq. ft., 5/-, post 8d. extra. Reduced prices for larger quantities on request.

CIRCULAR on mushroom cultivation free with each package of spawn.

MUSTARD

Pkt. 3d.

This is usually grown with cress.

WHITE.—The old English variety; seed used for making the well-known condiment.

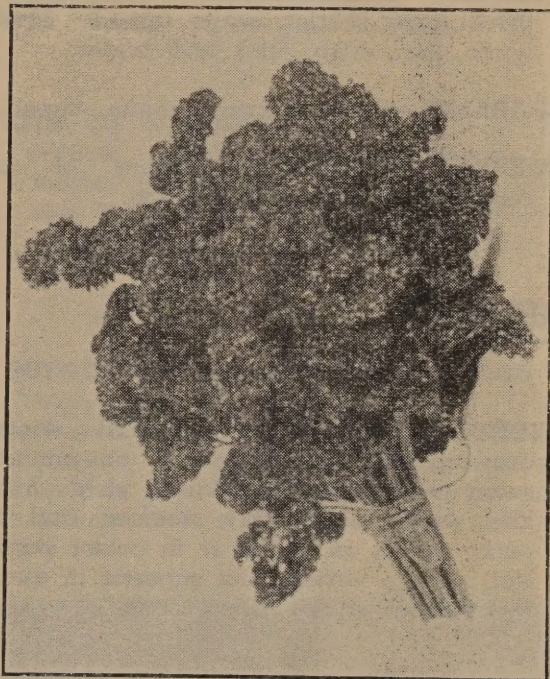

FORDHOOK FANCY.—The most beautifully curled and crested leaves; fine for garnishing.

PARSNIPS

Pkt. 3d., oz. 8d.

SHORT THICK.—A very early variety, roots filling out at an early stage. When fully grown is 6 to 8 inches long and $2\frac{1}{2}$ to $3\frac{1}{2}$ inches thick. Good for bunching for market.

HOLLOW CROWNED.—Thick shouldered strain, maturing later than Short Thick, but it is longer and larger. Excellent market strain.

Parsley—Paramount.

PARSLEY

Pkt. 3d., oz. 8d., 2oz. 1/- each variety.

TRIPLE CURLED or Extra Dark Moss Curled.

PARAMOUNT.—A triple curled rich dark green parsley. Uniform. When thinned plants will grow 12 inches high and 20 inches across. Dense broad fronds and stout stems for bunching.

SHORT THICK PARSNIP FOR A QUICK CROP

HORSE RADISH

Roots 6d. each, 4/6 doz., postage 3d. each; 1/- dozen extra.

RADISHES

Pkt. 3d., 2oz. 8d. each variety.

WHITE ICICLE.—Fine long white, maturing 20 to 25 days.

EARLY LONG SCARLET.—(Short Top) Early crisp, and fine flavour.

WHITE CHINESE.—These grow to a great size and are cooked like a turnip. Best sown in early autumn.

FRENCH BREAKFAST.—Olive shaped. Bright rose scarlet, white tipped. Flesh white, firm, crisp, juicy and tender.

SPARKLER.—Scarlet turnip, white tipped.

SURPRISE MIXTURE.—A mixture of all sorts, short, long and medium.

RHUBARB

Pkt. 6d., oz. 1/6.

SYDNEY WINTER.—The wonderful winter growing rhubarb, treated as an annual, sown in February or March, yields from late winter until early summer, and in early spring and summer in colder parts. Not a large variety, but superior in quality to most of the taller kinds.

SALSIFY (Oyster Plant)

SANDWICH ISLAND MAMMOTH.—A delicious vegetable grown like parsnip. The boiled roots have a distinct oyster flavor. Pkt. 6d., oz. 2/-.

SCORZONERA

A root vegetable not unlike Salsify. Perennial. Pkt. 6d., oz. 2/-.

SPINACH

See also Spinach Beet.
Pkt. 3d., oz. 8d., 2oz. 1/-.

PRICKLY SEEDED.—For autumn planting. Seeds being extremely hard, pre-soaking will frequently give a better stand of plants. Requires cool soil, plenty of water and frequent applications of Nitrate of Soda. When well grown it is not nearly so coarse as "spinach beet."

SWEDE TURNIPS

Pkt. 3d., 2oz. 8d. each variety.

CHAMPION OR IMPERIAL PURPLE TOP.—Very popular strain, large roots, globular in shape. Yellow flesh of good quality.

CRAIG'S PURPLE TOP.—A select heavy cropping strain of Scottish origin. Excellent quality.

TURNIPS

Pkt. 3d., 2oz. 8d. each variety.

WHITE STONE.—Early maturing strain of this popular all white market variety.

PURPLE PRINCE.—A purple topped white globe shaped variety, very attractive for market. Early maturing and of good quality.

ORANGE JELLY.—The best of all this class turnip, flesh yellow, and not strong flavored.

TOMATO

Pkt. 6d.

Sowings for late crops in County of Cumberland are usually made from end of November to early January. The cluster types have been very popular for a number of years, but larger types are also quite popular. Further north on the coast, sowings may be made later. F.W.R. indicates resistant to Fusarium Wilt.

POTENTATE.—F.W.R. A new variety from England. Very heavy cropping, smooth skinned, scarlet fruited variety, slightly larger than Recruit. See photograph inside front cover. $\frac{1}{4}$ oz. 2/-, oz. 6/-.

MARVANA.—F.W.R. The vine is similar to Earliana, being rather open and flat. Being a medium sized fruit, it is excellent for present-day market requirements. Matures quickly. $\frac{1}{4}$ oz. 1/-, oz. 3/-.

BREAK O' DAY, CERTIFIED F.W.R.—An exceptionally fine type for coastal plantings, both for home use and market. $\frac{1}{4}$ oz. 1/6, oz. 4/6.

SELECTED WALKER'S RECRUIT.—Similar type to Helvetia—larger than Bide's Recruit. Popular for autumn crop for Sydney market. There are many strains of this variety, some quite inferior, and too small. Be sure you get the right strain—Rumsey's have it. $\frac{1}{4}$ oz. 1/6, oz. 4/6.

MARGLOBE, CERTIFIED F.W.R.—Scarlet, smooth, solid and globe shaped. A very fine variety for market. $\frac{1}{4}$ oz. 1/6, oz. 4/6.

GROTHEN'S RED GLOBE CERTIFIED.—May be described as a better coloured Break o' Day. Did very well in our 1937-38 trials. $\frac{1}{4}$ oz., 1/6; oz., 4/6.

PRITCHARD, CERTIFIED F.W.R.—Scarlet, medium sized smooth fruits. Vines short jointed and foliage dense. $\frac{1}{4}$ oz., 1/6; oz., 4/6.

RED MARHIO, F.W.R.—Fruits are medium sized, mostly globe shaped, and have a scarlet skin with a slight pinkish tinge at certain stages of ripeness. Specially recommended for coastal plantings. Our strain of this popular variety has been selected for its better colour, even ripening, heavy yield and shape. $\frac{1}{4}$ oz. 1/6, oz. 4/6.

KEYSTONE, CERTIFIED.—For unstaked crops. Plants are compact and of determinate habit of growth, and may be planted in rows 3ft. apart, plants 27 inches in the row. Heavy yields of fine quality scarlet fruits. $\frac{1}{4}$ oz. 1/6, ob. 4/6.

AUSTRALIAN EARLIANA.—Strain selected for yield. Recommended for new ground in coastal districts. $\frac{1}{4}$ oz. 1/6, oz. 4/6.

CITY OF PARRAMATTA.—A new scarlet fruited vigorous-growing variety of the cluster type. When staked, fruits average 4-5 to pound, slightly larger than a good Walker's Recruit, smooth skin, excellent quality. $\frac{1}{4}$ oz. 2/-, oz. 6/-.

RUTGER'S CERTIFIED F.W.R.—Noted for its high color and delicious flavor. Globe shaped, thick and fleshy. Scarlet fruited, ripening from inside first; when red outside it is coloured right through. $\frac{1}{4}$ oz. 1/6, oz. 4/6.

Marvana.

LAWN GRASSES & FARM SEEDS

ALL MACHINE DRESSED AND TESTED

Owing to constantly fluctuating prices for farm seeds, prices are not listed, but current prices will be quoted on request.

LAWN GRASSES

6lb. seed required per 100 sq. yards.

We can supply heavily re-cleaned seeds specially for lawn as follows:—

LAWN COUCH.

AGROSTIS TENNIS—Creeping Bent grass.

PASTURE GRASSES

COCKSFOOT.—N.Z. Government Certified Mother Seed (Akaroa).

PHALARIS TUBEROSA.—Government certified Permanent Pasture.

PERENNIAL RYE.—N.Z. Government Certified Permanent Pasture.

WIMMERA RYE.—From selected pastures.

CLOVERS

BERSEEM.—Excellent for green feed for poultry.

PERENNIAL RED.—Government certified Montgomery (late flowering).

SUBTERRANEAN.—S.A. Govt. certified Mt. Barker (mid-season).

SUBTERRANEAN.—Dwalganup early maturing strain; Government certified.

SUBTERRANEAN.—Tallarook; Government certified (late strain).

WHITE.—N.Z. Government certified Permanent Pasture.

CHINESE CABBAGE

WONG BOK.—For poultry greens.

HUNTER RIVER LUCERNE

BEST BROADLEAF GIANT.—This is by far the most valuable fodder plant we have, and should be grown everywhere. It thrives best on deep sweet soils. While irrigation is necessary for heavy cuttings for hay, it is very drought-resisting, and provides excellent grazing in areas of moderate rainfall.

PEAS

FIELD PEAS, Grey.

LUPIN

NEW ZEALAND BLUE.—Excellent for green manuring.

KALE

THOUSAND HEADED.

CHOU MOLLIER.

MANGOLD

LONG RED.—For deep soils.

YELLOW GLOBE.—Best for shallow soils.

MUSTARD

Finest white. For winter green feed.

RAPE

BROADLEAVED ESSEX.—Excellent winter green feed for poultry.

TAGOSASTE

The so-called tree lucerne.

TARES AND VETCHES

PURPLE VETCH.

FLOWER SEEDS

LEAFLET ON HOW TO RAISE SEEDLINGS ON REQUEST

SEE SOWING CALENDAR, PAGE 3

Hardiness in respect to frost indicated as follows:—H.A.: Hardy Annual; H.H.A.: Half Hardy Annual; T.A.: Tender Annual; H.P.: Hardy Perennial; T.P.: Tender Perennial.

ACROCLINIUM, H.A.

GIANT FLOWERED HYBRIDS.—A new strain of this popular "everlasting" for cutting. Blooms much larger than older types. Shades of pink and white double and semi-double. Pkt. 6d., $\frac{1}{4}$ oz. 1/6, oz. 5/.

AGERATUM, H.P.

MEXICANUM TALL BLUE.—Showy plant growing up to two feet in height with clusters of bright blue flowers. Pkt. 6d., $\frac{1}{4}$ oz. 1/-, oz. 3/.

ALYSSUM, H.A.

LITTLE GEM.—Bedding Plant, white, fragrant. Pkt. 6d., $\frac{1}{4}$ oz. 1/.

LILAC QUEEN.—Beautiful soft lilac flowers changing to white as they age. A free and continuous bloomer of trailing habit. Pkt. 6d., $\frac{1}{4}$ oz. 1/6, oz. 5/.

COMPACT YELLOW.—Fine for edging. Perennial. Pkt. 6d., $\frac{1}{4}$ oz. 1/.

PROCUMBENS.—Carpet of Snow. A small trailing species suitable for carpet bedding and rock crevices. Pkt. 6d., $\frac{1}{4}$ oz. 1/-, oz. 3/6.

ANEMONE, H.P. (Windflower)

CHOICEST MIXED.—A mixture of all the best types. Pkt. 6d., $\frac{1}{4}$ oz. 1/9, oz. 5/6.

BULBS.—February to April. 9d. doz., 5/- 100. Country orders 3d. dozen., 1/- 100 extra.

AQUILEGIA, H.P. (Columbine)

Mrs. SCOTT ELLIOTT HYBRIDS.—An exceptionally fine free blooming strain of varied colours. Pkt. 1/-, 1-16 oz. 2/6.

BELLIS PERENNIS, H.P.

FINEST DOUBLE MIXED.—English Daisies. Does well in cool climates. Pkt. 6d., 1-8oz. 2/-.

CAMPANULA, H.B.

(Canterbury Bells)

ANNUAL MIXED.—Blooms from seed in less than six months. A great acquisition for warm climate conditions. Plants are hardy and can be grown at almost any time of the year. Mixture includes dark blue, light blue, pink, rose and white. Pkt. 6d., 1-8 oz. 2/6.

CALENDULA, H.A.

(English Marigold)

"Rust" is a fungus disease which has played havoc with Calendula in recent years. We have found regular spraying with Cooper's Colloidal Sulphur will keep it in check in most years. Spraying must be started before the disease makes its appearance.

ART SHADES MIXED.—This strain sold readily last winter. Contains many delicate and unusual shades. Pkt., 6d.; $\frac{1}{4}$ oz., 1/3; oz., 4/-.

ORANGE SUNSHINE.—A particularly fine acquisition. Beautiful orange shades of the "sunshine" type. Pkt. 6d., $\frac{1}{4}$ oz. 1/3, oz. 4/-.

CHRYSANTHA OR SUNSHINE.—Large bright golden yellow flowers, petals somewhat resembling chrysanthemum. Pkt., 6d.; $\frac{1}{4}$ oz., 1/3; oz., 4/-.

CAMPFIRE SELECT.—Brilliant orange with crimson or scarlet sheen. Pkt. 6d., $\frac{1}{4}$ oz. 1/3, oz. 4/-.

ORANGE KING.—Special Florists' strain. Rich orange flowers, fully double, well rounded. Pkt. 6d., $\frac{1}{4}$ oz. 1/-, oz. 3/-.

DOUBLE SPECIAL MIXED.—A mixture of all the best types and colours. Pkt. 6d., oz. 3/6.

LARGER QUANTITIES QUOTED ON REQUEST

ANTIRRHINUM (Snapdragons)

See Colour Plate, Inside Cover.

December sowings produce best quality spikes. Roots become well established before Winter, resulting in high quality blooms in early Winter and again in Spring. They may be sown up to early March for quality Spring blooms. Spring sowings are seldom as satisfactory. First flowers are usually rather short from Spring sowings, but length of stem will improve in the following Autumn.

Present demand is mainly for bright rose, terra cotta and apricot shades, with smaller quantities of yellow, deep reds and white.

Giant Mixed

TALL LARGE-FLOWERING GIANTS.

Pkt. 6d., 1-8oz. 1/9, ¼oz. 3/-, oz. 10/-. A very magnificent strain of this very useful flower. The spikes of bloom are tall, and the immense florets are set closely together. The colours are vivid and very varied.

FIRE FLAME.—Fiery red suffused orange scarlet.

SUNNYBROOK.—The most popular giant tango shade in cultivation. Light coppery bronze shaded salmon.

FORDHOOK ROSE.—Clear rose pink. Most popular cutting variety.

CANARY BIRD.—Very showy bright yellow.

ORCHID.—Mauve-pink.

RUBY.—Glowing deep red.

WALLFLOWER.—Rich coppery crimson and yellow.

GIANT MIXTURE.—A blend of the best colours. Pkt. 6d., 1-8oz. 1/6, ¼oz. 2/9, oz. 9/-.

COLLECTION OF TALL LARGE-FLOWERING GIANTS

1 Pkt of each 6 kinds for 2/6.

MAJESTIC SEMI-TALL.

Pkt. 6d., 1-16oz. 2/-, 1-8oz. 3/6, ¼oz. 6/-, oz. 20/-.

These produce giant flowers on half dwarf stems. For florists' work they are unexcelled. They are becoming more popular each year as they become known.

ORANGE KING.—Rich terra-cotta shades.

SUNSET.—A wonderful variety, shading from bright terra-cotta to lovely salmon.

EVENSONG.—Dense shapely spikes of a charming combination of chamois pink, apricot and buff.

ROSE MARIE.—A new salmon rose shade. First-class for cutting.

TRY THE MAJESTIC TYPES FOR CUTTING

ANTIRRHINUM—(Continued)

ROSELLA.—Magnificent spikes of well formed blooms of a beautiful rose shade. Enormous individual blooms of exceptional charm.

MAJESTIC MIXED.—A blend of the best colours and varieties. Pkt. 6d., 1-8oz. 3/6, ¼oz. 4/6, oz. 15/-.

INTERMEDIATE VARIETIES.

These improved strains grow plenty tall enough for cut-flower work. They are also excellent for bedding. Pkt. 6d., 1-16 oz. 2/-, 1-8oz. 3/6, ¼oz. 6/-, except where stated.

WHITE ROCK.—An immense flower of exquisite texture, pure white. The best white antirrhinum in cultivation. Early.

CHEVIOT MAID SUPREME.—Deep rose pink, long flower spikes of particular merit.

ORLANDO.—Large spikes of large rich bronze blooms. Impressive, popular and desirable shade. Outstanding in our 1938 spring trials.

HALF DWARF—Fancy Mixed.—The half-dwarf varieties are about the best for bedding and bordering purposes, and produce stems of flowers long enough for cutting, though not as large as the giant varieties. Pkt. 6d., 1-16oz. 1/6, 1-8oz. 2/6, ¼oz. 4/6, oz. 12/6.

PROHIBITION OF IMPORTS

From December 1st importation of Flower Seeds has been prohibited from certain countries. This will adversely affect supplies of some varieties, but we shall make every endeavour to supply at prices listed.

ASTERS

Some of the best quality aster blooms are produced during the cool autumn weather. To get blooms at this time, it is usual to sow during the latter part of December and early January. Because of tropical rains frequently experienced during the autumn, the stiff petalled types, such as American Late Branching and American Beauty, are very popular, but on account of their size and quality the California Giants are also extensively used.

Seedling raising during the hottest part of the year must be done with care. The soil is too hot for maximum germination unless some shade is provided.

IMPROVED CALIFORNIA GIANTS (Curled and interlaced, special strain).—The colours offered are peach blossom, deep rose, light blue, white, dark purple, light purple, and Mixed. Pkt. 6d., ¼oz. 3/6, oz. 12/6.

AMERICAN LATE BRANCHING, F.W.R.—The colours are: Azure, crimson, shell pink, purple, scarlet, white and Mixed. Pkt. 6d., ¼oz. 2/6, oz. 7/6.

AMERICAN BEAUTY, F.W.R. (Extra special strain).—The colours are: Deep rose, purple, shell pink, white, azure, crimson, and Mixed. Pkt. 6d., ¼oz. 2/6, oz. 7/6.

American Beauty Type Bloom

LARGER QUANTITIES QUOTED ON REQUEST

CARNATIONS, H.P.

The giant ever-blooming Carnations are unexcelled for bedding where a bright show is desired at a minimum of cost. Best treated as annuals, but may be grown on for several years. These strains have been re-selected and improved to bring them to the perfection desirable by the cut flower trade. Climatic influences apparently play an important part in flower formation in some seasons. Reports of this nature have come mainly from Queensland and other warm climates, particularly with the *Enfant de Nice* type. It is hoped that these re-selected strains will be less susceptible to this trouble.

ENFANT DE NICE.—The result of crossing Improved Chabaud and Perpetual varieties. This is the last word in annual carnations. Many flowers are $2\frac{1}{2}$ inches across and about 90 per cent. are doubles. Pkt. 1/6, 1-16oz. 5/-, 1-8oz. 9/-, $\frac{1}{4}$ oz. 17/6.

CHABAUD GIANT IMPROVED

CHABAUD GIANT IMPROVED.—A carnation of the marquerite type, coming into bloom 6 months from seed, and producing very large flowers highly clove scented. About 90 per cent. of the flowers come double. Pkt. 6d., 1-8oz. 2/6, $\frac{1}{4}$ oz. 4/6, oz. 15/-.

CANDYTUFT, H.A.

GIANT HYACINTH FLOWERED WHITE.—Florists' strain; extra select; grows to $1\frac{1}{2}$ ft. Magnificent spikes. Pkt. 6d., $\frac{1}{4}$ oz. 1/-, oz. 3/-.

UMBELLATA SPECIAL MIXED.—A fine type; excellent for bedding and cutting. As it sells best in mixed bunches, we have decided not to stock colours separately. Pkt. 6d., $\frac{1}{4}$ oz. 1/-, oz. 3/-.

CENTAUREA CYANUS, H.A.

(Corn Flower)

Sow where required; do not transplant. Spray for prevention of mildew.

DOUBLE BLUE BOY.—Flowers large, intense blue. Fully double and long stems for cutting. Pkt. 3d., $\frac{1}{4}$ oz. 1/-, oz. 3/-.

CINERARIA

These were at one time looked upon as plants for the greenhouse, but in our genial coastal climate they make fine bedding plants.

CALIFORNIA SUPER GIANTS.—Mixed. Produce enormous blooms in a variety of shades. Plants are base branching and bloom freely. Pkts. 2/6 and 5/-.

HYBRIDA CHOICE MIXED.—Seed from a very fine collection of this beautiful flowering plant. Pkt. 1/-, 1-16oz. 5/-.

CLARKIA, H.A.

CHOICEST DOUBLE MIXED.—An exceptionally fine mixture of all the brightest colours and most vigorous growing varieties. Pkt. 6d., $\frac{1}{4}$ oz. 1/-, oz. 3/6.

CYCLAMEN

(Bulbous Perennial)

PERSICUM GIGANTEUM MIXED.—Beautiful verandah plants. Pkt. 1/-.

ASK FOR QUOTE FOR LARGER QUANTITIES

DELPHINIUM, H.P.

Extreme care must be taken with germination moisture, or failure will result.

As delphinium seed frequently loses viability quickly, it is advisable to sow within three or four months of new seed being available.

GOLD MEDAL MIXTURE.—A splendid assortment, including the fine indigo blues, as well as the lighter colours. Absolutely the best of the Blackmore and Langdon and Kelway types. Enormous spikes on tall stems. New seed September and March. Pkt. 6d., $\frac{1}{4}$ oz. 3/-, oz. 10/-.

BELLADONNA IMPROVED.—The best clear, light blue delphinium for florists' work. Large flowered and strong grower. Grows to 5ft. tall. Pkt. 1/6, 1-8oz. 5/-. New seed September.

BELLAMOSUM.—Tall, dark blue. Pkt. 6d., 1-8oz. 1/6, $\frac{1}{4}$ oz. 2/9, oz. 9/6. New seed September.

❖ ————— ❖
**NEW DELPHINIUM
 PACIFIC GIANTS.**

A new strain originated on the Pacific Coast of U.S.A. by hybridists Vetterle and Reinelt. Produce huge flowers $2\frac{1}{2}$ to $3\frac{1}{2}$ inches in diameter; beautifully spaced on well-balanced spikes. Thin woody stems, and plants show comparative mildew resistance. Practically 100 per cent. double blooms.

Mixed Shades: 1/6, 2/6 and 5/- packet. Try them.

CHINENSIS, Blue Butterfly Improved.—Dark blue dwarf variety, 1ft. Pkt. 6d., $\frac{1}{4}$ oz. 3/6.

CHINENSIS.—Cambridge Blue.—A new clear belladonna blue flowered variety, growing to about 3ft. Pkt. 6d., 1-8oz. 3/-, $\frac{1}{4}$ oz. 5/-.

CHINENSIS.—Tall dark blue, 3ft. Pkt. 6d., $\frac{1}{4}$ oz. 2/6, oz. 7/6.

New seed of Chinensis types ready in December.

DIDISCUS, H.H.A.

(Blue Lace Flower)

COERULEUS.—A native of Western Australia. Very dainty. Pkt. 6d., $\frac{1}{4}$ oz. 2/-.

DIGITALIS, H.P.

(Foxglove)

FINE MIXED.—Immense spikes carrying a solid mass of beautifully spotted flowers. Pkt. 6d., $\frac{1}{4}$ oz. 2/-.

DIANTHUS, H.P.

(Pinks)

LACINIATUS, Double Mixed.—Deeply fringed petals, two or three inches across; blotched and fringed. Pkt. 6d., $\frac{1}{4}$ oz. 1/6.

GAILLARDIA, H.A. and H.P.

(Blanket Flower)

PICTA LORENZIANA.—Large, gay-colored double flowers. Annual type. Pkt. 3d., $\frac{1}{4}$ oz. 1/3, oz. 3/6.

GODETIA, H.A.

TALL DOUBLE.—Double azalea-like flowers on long stems, excellent for cutting. Cherry Red, Rose (Schamini), Rosy Morn and Mixed. Pkt. 6d., $\frac{1}{4}$ oz. 1/3, oz. 3/6.

SYBIL SHERWOOD.—Single, grows to about 20 inches. Salmon pink; tinted orange, white edges. Pkt. 6d., $\frac{1}{4}$ oz. 2/-, oz. 6/-.

KELVEDON GLORY.—Single upright type producing large blooms of a very vivid salmon, orange shade. Pkt. 6d., $\frac{1}{4}$ oz. 2/-, oz. 6/-.

❖ ————— ❖
NEW GODETIA

Double Sybil Sherwood (15ins.)

Beautiful double form of this popular shade. Pkt. 6d., $\frac{1}{4}$ oz. 3/-, oz. 10/-.

❖ ————— ❖

TALL DOUBLE ROSE IS A GOOD GODETIA

GYPHOPHYLLA, H.A.

(Baby's Breath)

ELEGANS—London Market.—Sprays of wee, white flowers used for making up bunches of sweet peas and other flowers. This is the largest pure white strain. Grows to 2½ft. Pkt. 3d., oz. 1/-, ¼lb. 2/9, lb. 9/6.

HOLLYHOCK

EARLY FLOWERING, Mixed.—A strain producing single and semi-double flowers of many pretty shades. Flowers first season from sowing. Pkt. 6d., ¼oz. 2/6.

LINARIA, H.A.

(Toad Flax)

EXCELSIOR MIXED.—New hybrids of this remarkable Lobelia-like flower. Pkt. 3d., ¼oz. 1/3, oz. 4/-.

LOBELIA, H.A.

ERINUM.—Crystal Palace.—Pretty blue flowered edging or bedding plants. Pkt. 6d., 1-16oz. 2/-, 1-8oz. 3/6.

LARKSPUR, H.A.

Sow in the garden where required during late autumn or early spring. May sowing seems to give best results in coastal districts. Sow where required to grow and do not transplant.

GIANT IMPERIAL.—Upright or delphinium form producing quality spikes on tall plants, which branch freely. Branches, however, grow upright, and do not spread out so much as the tall branching types. Best colours are Los Angeles Improved, brilliant salmon rose; Carmine King, Lilac, Dark Blue, Blue Bell (azure), and Mixed. Pkt. 6d., ¼oz. 1/6, oz. 5/-.

TALL BRANCHING MIXED.—The branching spikes are thickly set with fine double flowers in varied colours. Pkt. 3d., oz. 2/6.

Larkspur—Tall Branching

LEPTOSYNE, H.A.

Sow where required to grow in autumn. Quite a good cut-flower.

GOLDEN ROSETTE.—New double form of L. Stillmani growing to 18ins. tall. Blooms in 10-12 weeks from sowing. Pkt. 6d., 1-8oz. 3/6, ¼oz. 6/6.

MIGNONETTE, H.A.

The giant flowered Machet types make good growth. We have tried out all the leading types from various countries and can recommend the following strains:—

MACHET GOLIATH, Red.—Robust growth, spreading form; the large spikes frequently measure five inches in diameter. Pkt. 6d., ¼oz. 1/6, oz. 5/-.

MACHET, Giant Flowering Select.—Deliciously scented grey flowers. Pkt. 3d., ¼oz. 1/3, oz. 4/-.

ASK FOR QUOTATION FOR LARGER QUANTITIES

LUPIN, H.A. and P.

THE RUSSELL LUPINS.—So widely advertised are not, in our opinion, suitable for any but the coldest parts of Australia. That is, localities where other perennial types are a success. If clients wish to try them, we can supply at 1/- packet.

LUTEUS ROMULUS.—Yellow. Sweetly perfumed. Canary yellow. Dwarf growing. Pkt. 6d., $\frac{1}{4}$ oz. 1/3, oz. 3/6.

MENZIESII.—Best annual yellow Lupin for cutting. Buttercup yellow flowers on long stems. Pkt. 6d., $\frac{1}{4}$ oz. 9d., oz. 2/6.

CRUICKSHANKS BLUE.—Long spike, medium growth, good cutting variety. Pkt. 6d., oz. 2/-.

GIANT PEARL LUPINS.

Pkt. 6d., oz. 9d.

PINK PEARL.—One of the best things in cut flower line we have ever introduced. Sown about February, this beautiful annual will flower right through the winter in all but the colder localities.

BLUE PEARL.—Similar in size and form to the Pink Pearl, but blue in colour.

MIXED.—Pink, Blue and White.

NEMESIA, H.A.

LARGE FLOWERED MIXED.—Dainty, compact growing annuals, flowering freely in many colours. Pkt. 6d., 1-8oz. 3/-, $\frac{1}{4}$ oz. 5/6.

FINEST DWARF MIXED.—The dwarf varieties are very suitable for bedding, being not so readily blown over by strong winds. This is an excellent mixture, containing a large range of the best shades. Pkt. 6d., 1-8oz. 3/-, $\frac{1}{4}$ oz. 5/6.

FRENCH MARIGOLDS, H.H.A.

Popular as a cut flower late in autumn. Sow late January or early February.

GIANT TREE.—(4 feet high). Hardy and very free flowering. Good cut flower line, sown in February for winter blooms. Shades of brown and gold. Pkt. 6d., $\frac{1}{4}$ oz. 1/6, oz. 5/-.

AFRICAN MARIGOLDS, H.H.A.

Quite a profitable cut flower line sown December-January, or in frost-free localities even later.

GIGANTEA SUNSET GIANTS.—Blooms of enormous size on well branched plants 3 to 4ft. high. Colours range from deep orange through varying shades of gold and lemon to primrose. Flowers practically free from objectionable marigold odour. About 60 per cent. double. Pkt. 6d., $\frac{1}{4}$ oz. 2/6, oz. 7/6.

YELLOW SUPREME.—Tall double lemon yellow. Broad frilled petals. Pkt. 6d., $\frac{1}{4}$ oz. 2/6, oz. 7/6.

GUINEA GOLD.—Beautiful golden yellow double flowers with fringed petals. Plants grow to 3ft. tall, producing numerous blooms. Pkt. 6d., $\frac{1}{4}$ oz. 1/9, oz. 5/6.

LEMON BALL, all Double.—Petals heavily rolled, and flowers ball-like in form; very beautiful. Pkt. 6d., $\frac{1}{4}$ oz. 2/9, oz. 8/6.

ORANGE BALL, all Double.—A rich, brilliant orange. Pkt. 6d., $\frac{1}{4}$ oz. 2/9, oz. 8/6.

CHRYSANTHEMUM FLOWERED HYBRIDS.

—The delightfully formed flowers resemble incurved Chrysanthemums. They are carried on long stems of excellent value for cutting. Colours are gold, lemon, yellow and orange. Pkt. 6d., $\frac{1}{4}$ oz. 3/6, oz. 10/6.

SUPREME MIXED

Increasing the colour range of the now popular Yellow Supreme by the addition of orange, golden and primrose shades. In addition, this new strain is much earlier flowering than the original strain. As a commercial grower you cannot afford to be without. Pkt. 6d., 1-8oz. 2/6, $\frac{1}{4}$ oz. 4/6, oz. 12/6.

NASTURTITIUM, H.H.A.

Nasturtiums will grow and bloom in almost any soil, but it should not be too rich for the greatest wealth of bloom.

DOUBLE.

GOLDEN GLEAM.—Giant Double golden yellow blooms, long stems, suitable for cutting. Rather sweetly scented. Pkt. 6d., oz. 1/6.

DOUBLE HYBRIDS MIXED.—Glorious colors in Giant Double Sweet Scented blooms up to three inches across, and ranging from pale primrose through all shades of lemon and gold to shades of scarlet, orange scarlet, rose, and deep velvety crimson; also splashed and mottled shades. The scarlet and orange scarlet shades predominate. We recommend autumn sowing in coastal and warm districts, and they may be sown after frosts in the cooler parts. Pkt. 6d., oz. 1/6.

There is a keen demand for double flowered varieties in late autumn for florists' work. Make a good sowing this season.

DWARF GLOBE MIXED.—A colorful mixture of beautiful shades ranging from creamy white to yellow, rose, salmon, salmon-pink, orange, cerise, scarlet, blood red, crimson and mahogany. Plants are dwarf and compact, forming globe shaped bushes about 12ins. high. Double and semi-double flowers produced freely on long stems suitable for cutting. Pkt. 6d., oz. 1/6.

SINGLE

GORGEOUS MIXTURE.—Dwarf; brilliant flowers. This mixture includes all of the showy varieties of dwarf Nasturtiums with both light and dark foliage. Pkt. 3d., oz. 9d.

FORDHOOK FAVOURITE MIXTURE.—A truly giant race, comprising a large variety of colours in flowers of fine size. Pkt. 3d., oz. 9d.

NEMOPHILA, H.A.

MIXED.—Shade-loving plants. Pkt. 3d., 1-8 oz. 1/-.

Nasturtium Double

PANSIES, H.A.

(See Coloured Plate, Back Cover.)
Sow from January to April.

The greatest care must be taken in germinating pansy seeds to keep an even germination moisture. Drainage in seed beds must be good, but seeds should never dry out after sowing or failure will result.

MASTODEN SUPER MAPLE LEAF MIXED.

This new strain of pansy is of exceptionally vigorous growth. Flowers are of large size, fine form and substance, and cover a splendid range of colours and shades. Pkts. 2/6 and 5/-; 1-16oz. 10/-.

MASTODEN SUPER SWISS GIANTS, Mixed.

—An excellent exhibition strain of giant pansies, often measuring up to 3½ins. across, with velvety petals and a wide range of colourings and markings. It includes the richest reds, coppers, bronzes and yellows, together with the rose pinks and those beautiful light blues so delightful in pansies. The stems are very long and stiff. Pkts. 1/6 and 4/-; 1-8oz. 8/6, ¼ oz. 15/-, oz. 50/-.

MASTODEN ACES, Mixed.—This is our popular special mixed Mastoden, re-selected and several new colours added. For large beds for the house, or for cutting, there is none to equal it. Pkts. 1/- and 2/6, 1-8oz. 5/-, ¼oz. 8/6, oz. 30/-.

ASK FOR QUOTATION FOR LARGER QUANTITIES

ICELAND POPPIES

These beautiful perennial poppies have proved very suitable for bedding, and cut flowers treated as an annual in our climate.

Many overseas and Victorian strains are only at their best late in spring, which is rather late for growers in this State.

MAMMOTH SUNBEAM, Mixed (Brunets).—

An extra fine strain of Iceland Poppy, particularly good for cut flowers. The long stems, large blooms and range of colours are ideal for commercial cut flower work. Present market demand is tending towards art shadings, and this mixture has been selected along these lines, increasing proportion of pink and apricot shadings, with consequent reduction in orange shade. However, orange shades predominate. Pkt. 6d., $\frac{1}{4}$ oz. 3/-, oz. 10/-.

ORANGE AND YELLOW SHADES.—A very useful and harmonious blend of colours favoured by some growers for cutting. Long stems, vigorous growth, large blooms. Orange predominates. Very little white or pink. Pkt. 6d., $\frac{1}{4}$ oz. 2/6, oz. 7/6.

SELECTED ALL ORANGE.—Practically free from lighter colours. We offer this as the best All Orange Selection procurable. Pkt. 6d., $\frac{1}{4}$ oz. 4/6, oz. 15/-.

SELECTED ALL YELLOW.—Almost free of whites. These tonings are rapidly becoming popular for cut flower work. It has vigour. Pkt. 6d., $\frac{1}{4}$ oz. 4/6, oz. 15/-.

SELECTED PINK SHADES.—Blend of all the best shades of pink for cutting. Our endeavour has been to build up a strain of vigorous pinks suitable for early flowering under our adverse climatic conditions. Pkt. 6d., $\frac{1}{4}$ oz. 4/6, oz. 15/-.

PRIMULA, H.H.A.

MALACOIDES.—Carmine pink. Deep carmine rose. Largely used for bedding in the garden, particularly in the coastal and warmer portions of New South Wales. It makes a very fine, showy bed, and does not grow too large. Pkt. 6d., 1-8oz. 3/-.

RANUNCULUS

(Hardy Bulb.)

Sow in March.

GIANT HYBRIDS MIXED.—A beautiful new strain of this splendid spring flowering bulb. Pkt. 6d., $\frac{1}{4}$ oz. 1/6, oz. 5/-.

BULBS.—February to May. 9d. doz., 5/- 100. Country orders 3d. doz., 1/- 100 extra.

SCABIOSA, H.A.

The Pin Cushion or Morning Bride are amongst the most useful and hardy of cut flowers.

GIANT HYBRID MIXED.—A super strain of excellent colours. Pkt. 3d., $\frac{1}{4}$ oz. 1/6, oz. 5/-.

OUR ICELAND POPPIES
are selected for vigour and
winter flowering.

ORANGE POPPIES SELL WELL

SWEET PEAS

EARLY OR WINTER FLOWERING SPENCERS

For the cut flower trade, present demand is mainly for rose-pink and salmon shades, with lesser quantities of the orange-scarlet, crimson, blue and lavender shades. Last winter the mauve and crimson cerise shades sold very readily.

All of our seeds are saved from crops specially grown for seed purposes. Commercial growers who save their seeds from the tail-end of their crops, are advised to renew their stock at intervals to maintain size and vigour.

NEW VARIETIES OF MERIT

Pkt. 1/6, 1/4 oz. 3/-, each variety.
Collection.—1 pkt. of each for 3/6.

TREASURE ISLAND.—One of the longest stemmed early peas we have grown. Colour is a beautiful orange scarlet, but unfortunately it is inclined to burn rather badly during periods of intense sunlight and in frosty weather. In spite of this it is worth a trial.

CLIPPER.—A new duplex flowered black seeded white. The enormous double standard frilled flowers make a wonderful bunch. Very vigorous and plenty of fours.

PEERESS.—Another Duplex standard novelty from U.S.A., which did exceptionally well in our trials. Flowers are very large, and the colour a clear cerise pink of outstanding loveliness.

RECENT INTRODUCTIONS

Pkts. 1/- (5 pkts. for 4/-), 1/4 oz. 1/9, oz. 5/-, each variety.

IRIS BLUE.—This unusual shade is quite a novel addition to our list of well-tried varieties. Standard is deep bluish purple and wings are bright mid blue. Very vigorous.

NAVY BLUE.—A shade which has been wanted in early flowering sweet peas. Flowers are rich dark blue, carried on long stout stems. Vigorous growth—many fours.

CINDERELLA.—This prize winner from U.S.A. has done well in our trials. A clear light blue of value to florists. Blooms large and frilled; many fours. Long stout stems.

TITANIA.—A mammoth flowered deep rose self. A brighter colour than Josie, with larger flowers and heavier stems.

ROSE PICOTEE.—Large ruffled flowers 4 to a stem. The clear white flower with salmon pink edging makes it popular for evening table decoration.

GENERAL LIST

Pkt. 6d. (15 pkts for 5/-), 1/4 oz. 1/-, oz. 3/- each variety.

ATTRACTION.—Clear salmon-begonia pink on light cream ground. Very similar to Springsong, introduced a few years ago, but larger, longer in stem, and better spaced blooms.

BRIDESMAID.—Beautiful light salmon pink. Destined to become popular in the cut-flower trade.

SHIRLEY TEMPLE.—Beautiful shade of rose pink, large blooms. Long strong stems.

CHIME.—New and distinct shade of light salmon pink. Waved flowers on long stems. An outstanding commercial variety.

REDWOOD.—Bright rich crimson—large flowers on stout stems.

COLLEEN.—A very popular shade of rose pink. Growers who tried this last season report keen demand for the blooms.

LAVANDA.—Extra large blooms, perfectly spaced on long, strong stems. A vigorous grower, and the pure, clear lavender blooms hold a uniform colour from the time buds open until full bloom.

EXPOSITION PINK.—A gorgeous rich pink. The large waved blooms are well spaced on long, stout stems. Vigorous growth and very prolific. A marvel under artificial light. A similar shade to Superior Pink, which it has replaced.

STAR.—Sparkling rose pink on white ground, with a delightful salmon shading. Large blooms in fours on long stout stems. Popular colour for cut flower trade, and stems retain their length later in the season than many other varieties.

ASK FOR QUOTATION FOR LARGER QUANTITIES

GENERAL LIST (Cont.)

MARINER.—Clear marine blue with practically no mauve tint at any stage. Vigorous grower, producing four large blooms on long stout stems. A rival to Marine for best blue.

EMBLEM.—Long stems bearing 3 or 4 bright salmon cream pink flowers. Recommended.

SONNET.—A delicate blush pink produced on long stout stems—vigorous growth. Really beautiful when bunched.

GLAMOR.—Quite an acquisition to the now popular range of Salmon Pink shades. Deeper than Chime, but shows less cerise than Attraction—very large flowers on long strong stems.

DELICIOUS.—May be described as a Blush Pink on Cream. Very delicate and exquisite when bunched.

MARS.—A very fine large flowered deep crimson shade. Long stems and plenty of vigour.

DAPHNE.—Soft salmon pink, excellent for cutting, large blooms, long stems and vigorous growth.

FLORIST ROSE.—Exceptionally long stemmed variety. Immense blooms, four to a stem—pure rose pink, slightly deeper than Annie Laurie. Very free and continuous bloomer.

MARINE.—Largest true blue introduced. Standard over 2½ inches; good stems. In our opinion best commercial variety in this shade.

JOSIE.—An American variety of recent introduction. Vigorous rose pink, large flowers on long stems.

GIANT ROSE.—Immense rose-coloured flowers, as many as five on a stem.

MISS ANNIE LAURIE.—The richest, pure, rose pink Sweet Pea ever introduced. A marvel for cutting, having long stems, and it is a continuous bloomer.

AMERICAN BEAUTY.—The strongest-growing long-stemmed, largest early flowering Sweet Pea ever introduced. A very fine, rich crimson cerise.

SNOWSTORM.—One of the finest of all white winter flowering varieties. The flowers are extra large and of fine form.

CHEVALIER.—A true rose colour a little deeper than Florist Rose.

BURPEE'S LAVENDER.—Combination of length of stem, size of flower, purity of colour, and vigour makes this great for cutting.

VULCAN.—Dazzling scarlet cerise. Popular variety. The whole flower is suffused orange.

GLEAM.—Large flowers of geranium pink, with an effusion of cherry pink.

ORIENTAL.—Clear, deep cream blooms on long stems, many fours. Many standards are duplex, so that smaller number is necessary to make a bunch.

THE PREMIER.—A large-flowered scarlet with orange cerise sheen. Long stems and vigorous growth. A welcome acquisition to this colour class.

TRIUMPH.—Very large blooms. Glorious shade of rich mauve or deep lavender. Long stems. Good exhibition variety.

**EARLY FLOWERING MIXTURES**

BORONIA SPECIAL, MIXED.—An extra choice mixture of the best of our recent introductions and outstanding varieties. Pkts. 1/-, oz. 5/-.

SUNRISE MIXED.—A good mixture of the best varieties. Pkts. 6d., oz. 2/6.

LATE FLOWERING SPENCERS

May be sown in Autumn for Spring and Summer blooming in the mountains and cooler parts of Australia.

SPECIAL BLEND.—A very fine mixture of all the best sweet peas of this type. 6d. per packet, oz. 1/-.

LET US SELECT YOUR VARIETIES

DOUBLE STOCKS

Sow end of December to May. In cold mountain climates early varieties may be also sown in the early Spring. Plant out in rich, well-drained soil.

Great care must be taken with December and January sowings, as conditions are frequently very difficult at these times.

We do not offer any cheap seed of this favourite flower; it is difficult enough to secure a supply of doubles from the best seeds without spending time and money on what may prove a disappointment.

LARGE FLOWERING DOUBLE TEN WEEKS.

—Dwarf strain, excellent for bedding. Not so likely to be damaged by wind as the taller cut flower varieties.

A mixture from a collection containing blood red, bright rose, brown red, carmine red, chamois, copper carmine, copper rose, dark blood red, dark violet, grey red, light violet, pure white, rosy white, and violet rose. Pkt. 6d., 1-8oz. 2/-, $\frac{1}{4}$ oz. 3/6.

MAMMOTH BEAUTY OF "NICE."—Very

popular strain with commercial growers; also for bedding and home gardens. Height about 2ft. They produce a very large percentage of double flowers, and although they will frequently flower the second year, they are best treated as annuals.

In this strain best selling colours are White, Rosy Lilac (Rose), Light Blue (Mauve), and Deep Rose.

Colours: White, Rosy Lilac, Light Blue, Flesh Pink, Deep Rose, Crimson, Canary. Pkt. 6d., 1-8oz. 2/9, $\frac{1}{4}$ oz. 5/-, oz. 17/6.

Mixed: Pkt. 6d., 1-8oz. 2/6, $\frac{1}{4}$ oz. 4/6, oz. 15/-.

MAMMOTH NICE

COLLECTION

1 Packet each of the seven separate colours for 2/9.

GIANT PERFECTION.—A fine group, especially for florists. Very early and free blooming. Produces a high percentage of doubles. Grows 2½ft. tall. Most popular colours in this type for cutting are Rose, Silvery Lilac, Heatham Beauty and Violet.

Colours: Rose, Silvery Lilac, Canary Yellow, Blood Red, Snowdrift, Flesh, Violet

and Heatham Beauty (Golden Rose). Pkt. 6d., 1-8oz. 3/-, $\frac{1}{4}$ oz. 5/6, oz. 20/-.

Mixed: Pkt. 6d., 1-8oz. 2/9, $\frac{1}{4}$ oz. 5/-, oz. 17/6.

GIANT PERFECTION

COLLECTION

1 Packet each of the above eight separate colours for 3/-.

SUPER GIANT IMPERIAL (3ft.).—A new group of Giant Imperial Stock bred and selected for florists' use. Plants are base branching, each producing 12 to 15 huge flower spikes. The individual florets are large. As is usual with our strains, a large percentage of doubles are produced. Colours we can supply are: Deep Mauve, Rosecharm (deep rose). Pkt. 1/-, 1-16oz. 4/-, 1-8oz. 7/6, $\frac{1}{4}$ oz. 12/6 each variety.

DOUBLE GIANT IMPERIAL.—Also known as Improved Bismarck. Of branching habit, growing 24 to 30 inches tall. Produces a high percentage of doubles.

Popular cut flower shades are Golden Rose, Royal Purple, White and Buttercup. Pkt. 1/-, 1-8oz. 4/-, $\frac{1}{4}$ oz. 7/6, oz. 25/- each variety.

Mixed: Pkt. 1/-, 1-8oz. 3/9, $\frac{1}{4}$ oz. 7/-, oz. 22/6.

BROMPTON HARBINGER IMPROVED MIXED.—Most suitable for the cooler climates. One of the best types for flowering for several years in succession. Pkt. 1/-, 1-16oz. 3/6, 1-8oz. 6/6, $\frac{1}{4}$ oz. 12/-.

ASK FOR QUOTATION FOR LARGER QUANTITIES

STATICE**PERENNIAL—Hardy**

PEREZIL.—Rich Blue perennial. Pkt. 6d., 1-8oz. 2/6.

ANNUALS—Hardy

Pkt. 6d., oz. 1/-.

BONDUELLI.—Yellow.

SINUATA NEW HYBRIDS. Mixed.

SINUATA.—Market Growers' Blue. Excellent cut flower variety.

SINUATA ROSEA SUPERBA.—Pink.

SCHIZANTHUS, H.A.

"The poor man's Orchid."

GIANT HYBRIDS.—An exceptionally fine strain growing to 2ft. tall with a profusion of gaily coloured blooms. Pkt. 6d., 1-16oz. 3/-.

VIOLA, H.A.

This is a subject now extremely popular for bedding and bordering, especially when self-colours are desired. Taking the place of bedding pansies in this respect to a large extent.

LUTEA SPLENDENS.—Pure yellow, free flowering. Pkt. 6d., 1-8oz. 2/9, $\frac{1}{4}$ oz. 5/-.

BLUE PERFECTION.—Mid Blue, early and free flowering. Pkt. 6d., 1-8oz. 4/-, $\frac{1}{4}$ oz. 7/6.

CHOICE MIXED.—Pkt. 6d., 1-8oz. 2/6, $\frac{1}{4}$ oz. 4/6.

WALLFLOWER, H.A.

DOUBLE WONDER MIXED. — Annual, blooms five months from sowing. Plenty of the shades so desired for florists' work. Pkt. 6d., 1-8oz. 2/6.

WILD GARDEN MIXTURE

(For Autumn Sowing)

From a mixture of over 200 varieties of flowers. Suitable for children's gardens and waste corners. Pkt. 6d., oz. 1/9.

SEEDS OF CLIMBING PLANTS

BOSTON IVY (*Ampelopsis Veitchii*).—H.P.

The wellknown deciduous vine which enlivens the Autumn landscape with its gay coloured leaves. Pkts. 6d.

LATHYRUS PUBESCENS.—A beautiful blue perennial pea. Free climber. Pkt. 1/-.

LATHYRUS LATIFOLIUS.—Perennial Pea.

Live year after year, bearing beautiful clusters of flowers. Available in pink, white, red and mixed. Pkt. 6d.

STRAWBERRY PLANTS

For many years April-May planting has been the custom in coastal N.S.W., but recent experiments have shown that if plenty of water is available for irrigating, July planting has given much better results. However, we usually have plants ready from about Mid-April, and we can supply the principal varieties as follow:

PRICES:

9d. doz., 50 or over one variety 5/- 100. Special quotations for 1,000 lots.

For country orders add extra for freight and packing 6d. doz., 1/- for 50, 1/6 per 100.

Hardest and best varieties are:

French's Fendalcino, Creswell's Seedling.

RAIL (Goods Train)

This is most suitable for bulk seeds, potatoes, fertilisers, etc. Rates are the same whether prepaid or paid on delivery. Of course, where sidings are unattended prepayment is necessary, and freight must be remitted with order.

C.O.D. (Cash on Delivery) SYSTEMS

WE CANNOT SEND PLANTS C.O.D.

Postal parcels over 1lb. may be sent and paid for at your post office. For this service the Postal Department charges for collection 9d. up to 10/-, 1/- up to £1, 1/3 up to 30/-, 1/6 up to £2, and 3d. for each additional £1 or part thereof. Expensive for orders under 10/-.

Passenger Train Parcels—May be sent C.O.D. to any attended platform in N.S.W. Charges are 4d. per £ with a minimum of 6d., plus ordinary passenger train freight.

Giant SNAPDRAGONS

*Fordhook
Rose*

*Canary
Bird*

Orchid

Ruby

Sunnybrook

Wallflower

SEPARATE COLOURS or MIXED, 6d. Pkt.

MASTODEN PANSIES

MASTODEN SUPER MAPLE LEAF.—Pkts., 2/6 and 5/-. Exceptionally vigorous growth. Flowers are large, of fine form and substance, and cover a splendid range of colours and shades.

MASTODEN SUPER SWISS GIANTS.—Pkts., 1/6 and 4/-. This mixture contains the deeper shades which have made Swiss Giants so popular. Selected to eliminate small flowered types and to give an even balance of colours.

MASTODEN ACES.—Pkts., 1/- and 2/6. A very popular mixture for bedding and cutting. Wonderful range of colours.
